A PROBLEM WITH HIDDEN APPS

The latest digital trend growing in popularity for our children are apps on their phone or tablet that look like one thing but are secretly hiding another purpose. Children are becoming more and more familiar with 'secret' photo hiding apps, where an app which looks relatively ordinary is actually a hidden gateway to private photos and videos.

These apps allow their users to hide images, videos and notes within the app which is also passcode protected. One of the most common types of hidden app used is a 'fake calculator' app however many others are also available.

Parental Controls will not block them. These apps can bypass the parental controls you have put on your phone or tablet.

The most common use for the apps is to hide 'sexting' images which young people may be sending or receiving. This problem is growing rapidly amongst students, and from an increasingly early age. Not only is sexting dangerous, but it is illegal when it involves a minor even if both the sender and receiver are underage. By storing and sending these images, young people should be aware that they are committing a crime.

App Hider is a common app for hiding other apps that are available on Google Play, especially for WhatsApp Instagram and Facebook Messenger. App Hider is also an excellent app cloner for you to access multiple accounts from one device. More than that App Hider can hide photos and videos and hide App Hider itself by turn itself into a Calculator.

In the News...

A recent survey found that Almost a two-thirds of pre-teen children in Ireland are in contact with strangers online.

The survey by the children's Internet safety charity found that 31% of children game with people they don't know in real life and 61% of children reported being contacted by a stranger in a game (40% of boys vs. 22% of girls). Almost a third (30%) of children have friends/followers on social media platforms that they don't know in real life. This is particularly worrying in the context of the report published by Interpol on which highlighted concerning trends in relation to the production and sharing of child sexual abuse material online.

The survey also found that 65% of children are signed up to social media and messaging platforms despite minimum age restrictions of at least 13 on all of the most popular platforms.

Further Information

To find out more about social networking sites like Facebook, see Childnet's social networking guide for parents:

Here you can find lots of useful guide from the NOS website,

Below is one of these guides that you MUST read if your child is using Tik Tok

TikTok is a video-sharing social media app available on iOS and Android which lets users create, share, and view user created videos in a similar manner to Facebook, Instagram and Snapchat. Its main draw, however, is that users can record and upload bite-sized looping videos of themselves lip-syncing and dancing to popular music or soundbites, often for comedic effect, which can then be further enhanced with filters, emojis and stickers. TikTok has been designed with the young user in mind and has a very addictive appeal. At the beginning of 2019 it skyrocketed in popularity and has featured near the top of download charts ever since. Estimates suggest that it now has anything between 500 million and over 1 billion monthly active users worldwide.

What parents need to know about

TIKTOK

AGE-INAPPROPRIATE CONTENT

On the iOS store, TikTok is listed as 12+. On the Google Play Store it is rated as 'Parental guidance recommended'. When signing up to the app, it's possible to lie about your age without any form of verification. As children scroll through their feed, most of the videos they're likely to come across are light-hearted or designed to make people laugh. However there have been a number of videos reported for featuring drug and alcohol abuse, self-harm and young teens engaging in sexually suggestive content. More recently, suicide-themed related videos have been widely circulated. Given the deluge of material uploaded to TikTok every day, it's impossible to moderate everything and it can be common to come across explicit and age-inappropriate content on the 'for you' feed when logging into the platform.

INAPPROPRIATE MUSIC

TikTok revolves around creating music videos through lip-syncing and dancing. Inevitably, some of the music featured by users will contain explicit or suggestive lyrics. Given the undeniably young user base, there is a risk that children may look to imitate the explicit language they hear or the suggestive actions they see when viewing others user's videos on the app.

TIKTOK FAME

TikTok is very image focused and there is a notable preoccupation with appearing cool and attractive. Many teenagers now attempt to go viral and become what's known in-app as 'TikTok famous'. TikTok (and its predecessor musical.ly) has spawned its own celebrities – social media stars Loren Gray and Jacob Sartorius have been catapulted to fame through their initial exposure on the app. Obviously, most budding influencers looking to become the next big thing will be disappointed, but this may have the knock-on effect of making them go to more and more drastic lengths to get noticed.

ONLINE PREDATORS

As a social network, TikTok makes it easy to connect with other users. This includes the ability to comment on and react to other user's videos, follow their profile and download their content. Be aware that by default, any user can comment on your child's video if their account is set to public. Most interactions are harmless enough but as an app, TikTok is prone to predators because of the abundance of younger users.

ADDICTIVE NATURE

Social media is designed to be addictive and TikTok is no different. It can be fun and hugely entertaining. However, it is also because of this that it can be hard to put down. In addition to the short, punchy nature of the looping video format, the app's ability to keep you guessing what will come on screen next makes it easy to turn a five-minute visit into 45-minute visit.

IN-APP PURCHASES

Aside from the content, there's also the option to purchase in-app extras called 'TikTok coins'. Prices range from £0.99 for 100 coins to an eye-watering £93.99 for 10,000 coins. TikTok coins are used to purchase different emojis to reward content creators that a user finds funny or entertaining. In the iOS version of the app you can disable the option to buy TikTok coins but this sadly doesn't seem to be a feature in the Android version.

Safety Tips For Parents

TALK ABOUT ONLINE CONTENT

Assuming your child is above the age limit to use TikTok, make sure you take the time to talk to them about what they are seeing on the app. Have an open dialogue, get them to give you their opinion on what is appropriate and model the correct behaviour. Go over why they shouldn't give out private information or identifiable photos and be positive and understanding. In the long run, getting them to think critically about what they're seeing goes a long way to keeping them social media savvy.

USE PRIVACY SETTINGS

Undoubtedly, the easiest way to safeguard your child on TikTok is to make sure their account is set to private. This means only those users your child approves can view, like, and follow their content. Setting the account to private may clash with your child's goal of social media superstardom, but it will keep their account secure from strangers. This setting can be enabled under the privacy and safety menu by pressing the ellipsis in the 'me' tab of the app. To be extra safe, there are additional controls available to toggle such as who can send comments and messages, among other options.

ENABLE RESTRICTED MODE

In the digital wellbeing section there's the ability to turn on restricted mode using a PIN. Restricted mode filters out content that is not age appropriate although it should be noted that this isn't always 100% fool proof. When enabling restricted mode, parents should still be vigilant to what their child is watching and take note that the algorithm moderating content is not infallible.

MONITOR VIEWING HABITS

Even if it doesn't make you popular, keep a close eye on what your child is viewing and sharing on TikTok. Whilst the app has moderation tools, videos can still slip through the net so it's important to regularly check in on what they're watching. Understanding and learning the app yourself is a great way to get to grips with it. You could then even watch some videos with your child, turning it into a bonding opportunity also.

LEARN HOW TO REPORT AND BLOCK INAPPROPRIATE CONTENT

With the proper privacy settings in place, TikTok can be a relatively safe space for your child to express themselves. However, in case something does manage to slip through, make sure your child knows how to recognise and report content that isn't appropriate and get them to come to you about what they have seen. TikTok allows users to report offenders and comments within the app. You can also block individual users by going on their profile.

MODERATE SCREEN TIME

As entertaining as TikTok is, you can help your child moderate their time on the app by making use of the digital wellbeing section. Under the screen time management option, you can limit the daily allotted time allowed on the app in increments ranging from 40 to 120 minutes. You can also lock this preference behind a PIN number which has to be inputted in order to then exceed the daily time limit. This way your child can get their daily dose of memes without wasting away the day.

FAMILY SAFETY MODE

TikTok Family Safety Mode allows parents to link their own TikTok account to their child's. It's a great way to oversee your child's digital wellbeing by giving you direct control over their safety settings and being able to remotely turn features on and off. This includes managing screen time, the ability to send and receive direct messages (and with whom) and the ability to restrict the appearance of content that might not be age appropriate.
